MANUFACTURING

Thank you very much for your interest in Boda Games! We are very excited to introduce our company, our board game production facilities and our industry knowledge to you. For many years we have provided our customers with an encompassing range of board and card game manufacturing solutions as well as other services. And we are always excited to meet new publishers and designers and work on game projects together. This brochure will give a brief introduction of Boda Games as a company. It will provide examples of the different board game components that we have produced over the years and can help you produce as well. Furthermore, we will show some of our other services that we offer in addition to game manufacturing, that allow you to streamline your production process and improve efficiency.

All of us at Boda Games are very fortunate that we are part of such an intimate, positive and creative industry. An industry that celebrates originality and outside the box thinking. We believe that the board & card game industry is one that transcends traditional borders by allowing people to connect through their mutual love for the medium. Conventions are held all over the world, and people from even more countries are attending them. For us, being able to meet different types of people in different places and talking to them, learning from them and working with them, is one of the most rewarding parts of the job.

As such, we welcome any questions or requests that you might have! Come find us if you want to talk about board games, about the various manufacturing processes or anything else. We're available via email, over the phone, chatting or in person at one of the many conventions we attend. Let's make games!
